

Balloon Toss Challenge

The object for this game is for the Passenger to Toss a Balloon full of (Ice cold) water filled to about the Size of a Small Mellon or Grape Fruit, not to full so that a person can toss it up and over a Stationary Arm or threw Hoop, and then catch it with out breaking it **while the operator rides without stopping**.

You can use the Equipment pole set up that you have made for the winner Bite it can double for this event . That is if you have made this piece of equipment or you can just Rig something up.

One recommendation that I suggest is that you make the Height of the Bar that the Balloon is to be tossed over is High enough so that the Passenger Standing on foot Boards just Cant plop it over. We have made this a lot more challenging by Modifying a old Hula hoop and making it a bit smaller, but not to small, still this is not a that difficult to get the Balloon threw, so why not either run some Screws threw the Hoop so if the Balloon Hits a Screw. Well some one will be screwed or t I should say Wet, and if you do not want to reduce the size of the Hoop maybe wrap it in Barbwire. Very Challenging and Fun even more fun if you are watching.

Note: If you are going to wrap your hoop in Barb wire or add screws to it Be sure the Hoop is High enough so that a Passenger can not Reach it, Trust me I know this from first hand experience of watching someone grabbing a low Hoop with a few screws in it even though they were well aware of the Screws Instinct will make some one want to try to grab or reach for the Hoop, So Be Sure the Hoop is out of reach.

Once the operator Rider starts the run no stopping under the Hoop or Arm and no placing a foot down for either of the teammates

No score (Point) if one stops

This is a fairly challenging game and you may want to keep going till you have a team succeeds in being able to toss and catch a Balloon. And like I said earlier it is fun to watch.
