

Slow Race

Pretty simple and straightforward the object is to be the last one to cross the finish Line Or still be riding to the finish having everyone else crossed the end line (Finish line) or disqualified.

Rules.

1) All riders have to leave the start at the same time any **unreasonable delay** more then 2 **second 3 max should result in Rider being disqualified.**

2) Once a Rider Leaves the Starting line. The rider will be **disqualified** if placing one or both feet on the ground. Unless everyone else is out of race

3) The Riders should have **marked Lanes**, Crossing out of your lane results in being disqualified, You may want to allow **minor lane crossing**, but this must be agreed upon before this event and may cause some one to complain.

To solve this make all the lanes 6 or 7 feet wide and have absolutely no lane crossing.
The length of Course is up to you, all though 75 to 100 ft seems to be antiquate.
