

### Tennis Ball Slalom Pick & Set

The Tennis Ball Slalom Pick & Set is an excellent test and Challenge for both rider skills and passenger dexterity. As the rider Slaloms from one side to the other between a row of cones with a tennis ball placed on the top of each cone, so as they ride pass the cones the passenger picks up as many Tennis Balls as He or She can. Then the rider turns around and Heads back slaloming again back and forth between the row of cones. Here the passenger must replace The Tennis Balls back on top of the cones. So the team who successfully picks up and replaces the most Tennis balls wins.
